
SMART
GAMES

GAME RULES

BEFORE YOU START: Make sure the game board is turned the right way - so you can read the word "SmartGames" at the bottom.

1. Choose a challenge. Challenges show a top view. Place the eggs and dinos exactly as the picture shows.

2. Position the other dinos on the gameboard:
   - The legs of the dinos should always fit (perfectly leveled) on top of the gameboard's pins. Each dino will occupy 2 adjacent pins.
   - The legs of the dinos cannot stand on top of eggs.
   - A dino's tail can sometimes hang over an egg, but never over the egg with the baby dino inside.
   - Tails can stick out over the edge of the board, but only where there is a gap between the plants.
   - Tails of different dinos can never occupy the same space on the gameboard.
   - The red dino's head works the same way as tails - it can hang over closed eggs or off the edge (through plant gaps). It can never share the same space as the tail of another dino.

3. There is only 1 solution, which can be found at the backside of each challenge in the booklet.

Tips for parents and teachers

For young children, this game is harder than it looks, because it's a puzzle game in 3D. For the STARTER and JUNIOR levels, finding the right position of the pieces in the challenge is probably harder than finding the solution. Therefore, kids will need guidance, especially when they set up a new challenge.
