GAMES

GAME RULES

Before you start:
Open the transparent case and place it open on a table to create a V-shaped game board that is angled at 45°.

1. Choose a challenge:
   - Starter challenges show the complete frontside and backside of the final cube.
   - Junior and Expert challenges also show the front and backside, but some information about the colours in the final cube is missing (indicated by white squares).
   - Master and Wizard challenges only show the front side of the final cube.

2. Place the 7 puzzle pieces on the transparent tray to create a cube. All 7 pieces must be used in every challenge.

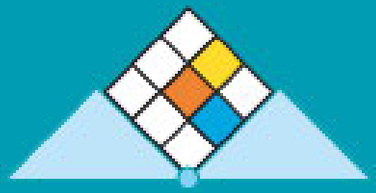

3. You have found the correct solution when you have create a full cube with all squares the same colour as shown in the challenge. There is only 1 solution, which can be found at the end of the challenge booklet.

Hints

- When a challenge includes missing information about the colour of individual pieces, you may find the solution easier if you concentrate on the pieces you don't see in the challenge, instead of only focusing on the pieces you can see.
- Build your cube from the bottom up. If information of the pieces at the bottom is missing, use logic and deduction to figure out which pieces belong there. If you try to build your cube from top to bottom, you will discover that you will not have enough hands to keep all puzzle pieces in place.
